The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status								
1) Responsive to communication(s) filed on <u>Pre-</u>	Amendment filed on 1/16/2002.							
2a) ☐ This action is <b>FINAL</b> . 2b) ☐ This action is non-final.								
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is								
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims								
4)⊠ Claim(s) <u>56-98</u> is/are pending in the application.								
4a) Of the above claim(s) is/are withdrawn from consideration.

Art Unit: 2818

## DETAILED ACTION

Claims **56-98** are pending for examination.

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 56-89 are drawn to a memory device having an evaluation circuit coupled to complementary lines of sense amplifier and generating an output signal having logic value indicative of a pass-fail condition in accordance with logic levels of the complementary inputs, classified in class 365, subclass 205.
  - II. Claims **90-93** are drawn to a method for testing multiple columns of memory having the steps of "concurrently coupling multiple columns to complementary data lines", "coupling a data line to ground...", etc., classified in class 365, subclass 201.
  - III. Claims 94-98 are, drawn to a method for testing multiple columns of memory concurrently having the steps of "precharging first and second data nodes", "performing a first Boolean OR function based on logic state of first OR function", etc., classified in class 365, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process

Art Unit: 2818

for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the memory device recited in Group I can be tested a different method using different OR functions and/or logical Boolean conditions for testing as similarly recited in claim Group II (see claim 94).

- 3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the memory presented in claim Group I can also be tested by different testing method using "precharging a pair of complementary data lines", for example, as recited in claim Group II (see claim 90).
- 4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, or vice versa, for a same memory device with possible multiple testing methods claimed possible; therefore, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 09/964,113

Art Unit: 2818

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q Nguyen whose telephone number is (571) 272-1788. The examiner can normally be reached on 7am-6pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (703) 308-4910. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
